

## PROMOTING RECYCLABLE MATERIAL USAGE FOR A GREENER FUTURE

### A Commitment to Our Planet

At the heart of our brand is a deep commitment to protecting our planet for future generations. We believe that sustainability isn't just a trend—it's a responsibility. That's why we've taken significant steps to ensure that our products are made with the environment in mind. But this isn't just any sustainability claim. Our gloves are certified by the **Global Recycled Standard (GRS)** and the **Recycled Claim Standard (RCS)**, giving you the confidence that you're choosing a product that truly makes a difference.

### The GRS/RCS Certification – What It Means

These certifications are more than just labels—they are global benchmarks that ensure our products meet the highest standards of environmental responsibility. These certifications are applicable to companies in the textile industry. Additionally, recyclers, distributors, and brands seeking international recognition for their recycled products and sustainable practices can also obtain these certifications

#### Global Recycled Standard (GRS):

The GRS certification guarantees that our gloves are made from recycled materials. (Recycled materials – at least 20% recycled content) This standard tracks the entire supply chain, ensuring that every step—from sourcing to manufacturing—adheres to strict environmental and social criteria. By choosing GRS-certified gloves, you're supporting a system that reduces waste, saves energy, and lowers greenhouse gas emissions.

#### Recycled Claim Standard (RCS):

The RCS certification focuses on the integrity of the recycled content in our gloves. (Recycled materials – at least 5% recycled content)

- This certification ensures that the materials used are genuinely recycled and not just downcycled from inferior sources. The RCS provides traceability from the recycler to the final product, so you can be assured that your gloves are made with authentic, high-quality recycled materials.

# THE IMPACT OF YOUR CHOICE

**Traffi**®  
THE HAND PROTECTION SPECIALISTS

When you choose our GRS/RCS-certified gloves, you're doing more than just buying a product — you're making a positive impact on the planet. Here's how:

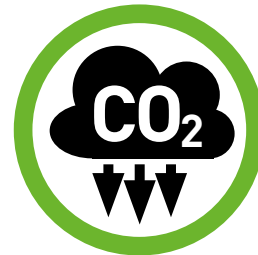

## Reducing Waste:

Our gloves are crafted from post-consumer and post-industrial waste, diverting materials that would otherwise end up in landfills. This helps to reduce the environmental burden of waste disposal and supports the circular economy.

## Conserving Resources:

Recycling materials consumes less energy and water compared to producing new ones from scratch. By opting for our gloves, you're helping to conserve valuable natural resources, such as water and fossil fuels.

## Lowering Carbon Footprint:

The production of recycled materials generates fewer carbon emissions compared to virgin materials. By choosing our gloves, you're contributing to the reduction of greenhouse gases that are driving climate change.

## GRS/RCS Logo usage

The GRS and RCS logos are used to signify that a product meets specific criteria for recycled content and responsible production practices. These logos can only be used by certified companies, and they must be applied in accordance with strict guidelines to ensure proper representation of the certified content and adherence to chain of custody. Unauthorized use or misrepresentation of these logos is prohibited, and the logos should be prominently displayed to provide transparency to consumers.

## Beyond Certification – Our Ongoing Commitment

While GRS and RCS certifications are important, they are just one part of our larger sustainability journey. We are continuously looking for ways to improve our processes, reduce our environmental impact, and support ethical practices across our entire supply chain. Purchasing products with both GRS and RCS certifications offers assurance of authenticity, quality, and ethical practices, while also aligning with their values and contributing to a more sustainable and responsible global economy.

## Join Us on This Journey

We invite you to join us on this journey toward a more sustainable future. By choosing our GRS/RCS-certified gloves, you're not just getting a high-quality product—you're supporting a movement that values the health of our planet and the well-being of everyone who calls it home. Together, we can make a difference.

Every glove we produce is a step toward a greener, more sustainable world.

**Thank you for choosing to be part of this journey.**
